RUN_EVIDENCE — OmniTrainer: Multimodal Customer Service Trainer

This file contains the four evidence items required for submission: (1) the full unit-test run, (2) one eval run, (3) a Gradio conversation with a flagged message and its rationale, and (4) the Phoenix traces showing the span names.

1. Unit tests — `uv run pytest tests/ -vv --ignore=tests/test_env_setup.py`

Result: **45 passed**.

```
warning: `VIRTUAL_ENV=/voc/data/venvs/project/starter` does not match the project environment path `.venv` and will be ignored; use `--active` to target the active environment instead

3. Gradio UI — flagged message with rationale

The message “I am sorry but I absolutely cannot offer a refund” was flagged as unfriendly. It was not sent to the AI customer, and the rationale appears in the Moderation Agent Feedback panel.

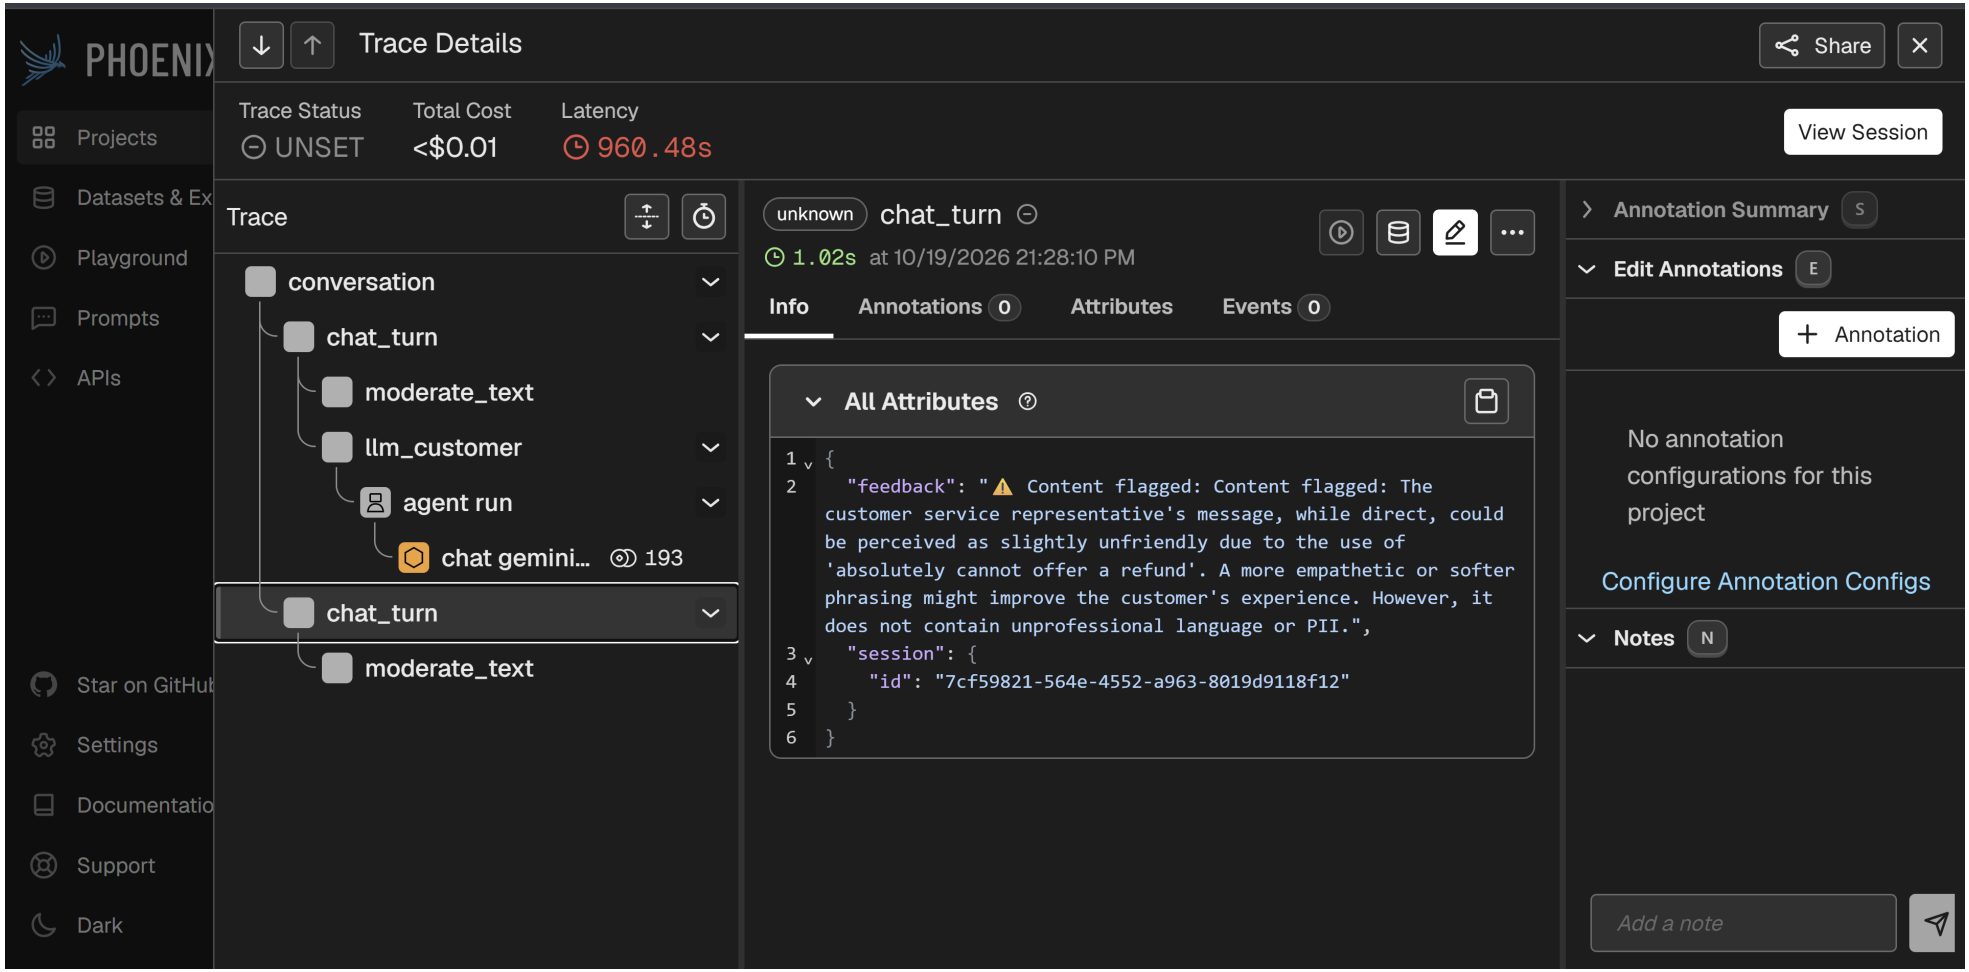

4. Phoenix traces — span names

Trace tree showing the `conversation` span (with `session.id`) and its child spans `chat_turn`, `moderate_text` and `llm_customer`.

4 (continued). The `feedback` attribute on the flagged chat_turn

4 (continued). The moderate_text span for the flagged message
